

CONTINUOUSLY VARIABLE TRANSMISSION FLUID (HONDA CVT PERFORMANCE)

Typical Properties

Appearance	Red, dyed
Viscosity, cSt	
At 100° C	8.30
At 40° C	37.70
Viscosity Index	205
Viscosity, SUS	
At 210° F	53.9
At 100° F	186.8
Flash Point, (COC)°F (Min.)	340
Pour Point, °F	-40
Gravity, API	30.5

The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.

Manufactured from selected, highly refined base stocks and compounded with additives to enhance oxidation stability and thermal resistance, improve low temperature operation, impart specified friction control, improve load-carrying ability, resist corrosion and foaming tendency.

APPLICATION

Recommended for Honda Continuously Variable Transmissions. The product is manufactured to satisfy primary specification and performance requirements of Honda CVT Fluid in functioning original equipment transmissions under service conditions. CVT Fluid is recommended to ensure smooth operation between service intervals for Honda Continuously Variable Transmissions. Due to this fluid's wide temperature operative range and lubricant properties, the product may be suitable for other applications.
