The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.

These SAE Single-Grade (approx ISO grades noted) non-detergent engine and industrial oils are formulated for a variety of engines and other uses. They are blended from highly refined naphthenic base stocks and do not contain metallic additive or organic residues.

APPLICATIONS

These oils are used in a wide range of customer applications. The specific recommendations are determined by individual customers based on their practice and knowledge of the machinery or mechanical systems to be lubricated.
