

## PREMIUM POWER STEERING FLUID

### Typical Properties [PS FLUID]

Appearance	Light. Amber Clear
Flash, COC, Deg F.	360
Pour Point, Deg F.	-40
Viscosity, cSt	
At 40 C.	37.84
At 100 C.	7.14
Viscosity Index	154

The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.

Premium Power Steering is formulated from highly refined base oils and carefully selected chemical additives to meet the performance demands of powering steering systems. The product is designed to protect power steering systems against pump deterioration by preventing abnormal oxidation, foaming, and wear. The product is compatible with commonly used seal and hose materials to ensure excellent service life from these components. The product is formulated to a higher viscosity index with excellent low temperature properties which provides protection when operating over a wide range of summer and winter temperature conditions.

### APPLICATIONS

This product provides performance characteristics in power steering system for most automobiles, light trucks, farm equipment, applications calling for a hydraulic power steering fluid. The product is not recommended for Honda power steering systems or requirements of Chrysler fluid specification MS-1872-T composed of a mineral oil without additives.

\*Consult your owner's manual for fluid specifications to check suitability of this fluid.
