

PREMIUM POWER STEERING FLUID

Product Overview

Premium Power Steering Fluid is formulated from highly refined base oils and carefully selected chemical additives to meet the performance demands of modern power steering systems. It is designed to protect these systems against pump deterioration by preventing abnormal oxidation, foaming, and wear. Compatible with commonly used seal and hose materials, the fluid helps ensure excellent service life of system components. Formulated with a high viscosity index, it offers excellent low-temperature properties and provides reliable protection across both summer and winter conditions.

Applications

This product provides dependable performance in power steering systems for most automobiles, light trucks, and farm equipment applications requiring a hydraulic power steering fluid. It is not recommended for use in Honda power steering systems or in applications requiring Chrysler fluid specification MS-1872T, which is composed of a mineral oil without additives.

*Consult your owner's manual for fluid specifications to check suitability of this fluid.

Typical Properties

Property	PS Fluid
Appearance	Light Amber, Clear
Flash Point °F (COC)	360
Pour Point °F	-40
Viscosity @ 40°C (cSt)	37.84
Viscosity @ 100°C (cSt)	7.14
Viscosity Index	154

*The values shown are typical of current production. Some are controlled in the manufacturing process, while others are not. All of them may vary within tolerable ranges.
