

METAL PREVENTATIVE L

Product Description

Rust Preventative L is formulated with high quality hydrotreated base stocks and proprietary additives to offer adequate rust protection, defoaming, lubricity and tackiness at low to moderate temperatures. The low viscosity offers satisfactory lubrication in systems which run at low to moderate operating conditions.

Applications

Rust Preventative L can be used in systems and equipment in conditions which are not demanding. It is suited for thin-film protection of finely finished parts and for use in just before parts are packaged for storage or shipment.

Typical Properties

| Property | |
|------------------------|------|
| Viscosity, cSt @ 40°C | 18.4 |
| Viscosity, cSt @ 100°C | 3.85 |
| Viscosity Index | 99 |
| Flash Point, (COC) °F | 356 |
| Pour Point, °F | 5 |
| Gravity, API @ 60°F | 35 |
| Density, lbs/gal | 7.09 |

*The values shown are typical of current production. Some are controlled in the manufacturing process while others are not. All of them may vary within tolerable ranges.
